## portfolio

IOS APPLICATION USING SWIFT

- ❖ https://github.com/Ryosuke-Hujisawa/TaskClock-Swift
- ❖ https://github.com/Ryosuke-Hujisawa/lupoMaker-Swift3

## Technology Summary

- **Frontend and Backend** : PHP, Node, Javascript, HTML5, CSS3
- **Mobile app :** Swift also **I LIKE Server Side Swift**
- **Database :** Mysql phpmyadmin, Sequel Pro, terminal
- **Tools/IDE :** Git, GitHub, SourceTree, Xcode, JetBrains, (SublimeText, Atom)
- **System :** Mac OS, Linux/Unix, Amazon Linux, Ubuntu
- **Network :** AWS, mamp, Laravel
- **Local :** mamp
- **Framework :** Stripe, Avfoundation, jQuery, Datatable.js, Dropzone.js, Laravel, Django,

# Day off Work

- Participate in **OSS projects**
- A big challenge. One Day I want to **raise my own language** Call it サンゴ（珊瑚）Coral

# How can I give contribute ?

- **Huge contribution :** Team development using Git and Swift (DB operation, API operation, Server communication) also Object-oriented development based on class
- **Common Contribution :** JS(HTML, CSS) PHP and Database development of web service,
- **More study :** Learn Python, Lisp and **Mathematics**
